

Assessment Standard Statement Overview

Common Assessment Working
Group

2 March 2004

Goal

- To improve Fleet maintenance efficiency and consistency by developing and implementing a Common Fleet Assessment Entitlement Process

Tasking

- The FTSCs were tasked by the FMO-LBOD on 2 DEC 02 to develop a common Navy process for assessments
 - Part of this tasking was for the FTSCs to enter Block 35 data into 2-Kilos for all assessment findings
 - Block 35 data written by FTSC techs in the past were not as complete as desired

Improving 2-Kilo Block 35 Data

- To improve the quality of Block 35 data, the FTSCs were tasked to develop standard statements
 - Improve consistency between techs' data input
 - Make the data input process easier and more efficient
- During the improvement process, The Working Group proposed a definition of what a Maintenance Ready 2-Kilo is
 - Generated White Paper

Standard Statements - Phase I

- PAC/LANT work in conjunction to create standard statements for technicians to use during assessments
 - HM&E Standard Statements
 - FTSC LANT lead to create HM&E statements (6,000+)
 - Developed from FTSC LANT database of assessment findings
 - Tech Codes at FTSC PAC lead reviewing/modifying/approving of these Standard Statements. (Created 2,000+)
 - Combat System Standard Statements
 - FTSC PAC lead to create Combat statements (3,000+)
 - Created by SMEs for SMEs on most common 2-Kilo's written while on assessments
 - Both uploaded for immediate use in database

Standard Statements Phase I – Cont.

- Continue to create Standard Statements
 - New Statements will be derived from items flagged on 2-Kilos written in FAST
 - Ongoing process
- Link Common Assessment Procedures approved by MER to development of future standard statements
 - And vice-versa

Standard Statements - Phase II

- Recent NAVSEA 04 discussions identify future efforts to expand into Phase II which include:
 - Link statements with ICMP
 - Link Common Assessments with EOC
 - Other areas?

Standard Statement Review Guidelines

- Goal breakdown
 - Reduce **assessor** paperwork
 - Increase **assessor** productivity
 - Increase first approval of deferred work
 - Increase accuracy of equipment assessment
 - Increase visibility of repeat discrepancies
 - Increase inter and intra ship class trending of failures

Standard Statement Review Guidelines

- Levels of Review
 - End User / Assessor
 - Concerned with usefulness and effectiveness
 - System Owner (SME, AD, & ISE)
 - Concerned with assessment accuracy
 - Maintenance Team / Class Team / TYCOM
 - Concerned with first pass yield

Standard Statement Review Guidelines

- New Statement Generation
 - During assessment
 - CACI stand-alone Access database
 - Bulk Upload
 - Ship's Force (CSMP)

Standard Statement Review Guidelines

- Who should review new Statements?
 - Cognizant equipment SME
 - Cognizant equipment ISE
 - Cognizant component SME
 - Assessment Director
 - PE or MT

Standard Statement Review Guidelines

- Statement review best practices
 - Review statement for uniqueness
 - Review for simplest form
 - Review system, component, subcomponent against standard navy nomenclature
 - Review recombined statement for readability

Standard Statement Review Guidelines

- Priority of Statement database value
 - System discrepancy relevance (to assessor)
 - Component universal use
 - Subcomponent universal use
 - Data mining

Standard Statement Review Guidelines

- Recommendations
 - Off-line database is adequate for use by RMCs with following suggested improvements
 - Incorporate menu option to perform component level review and statement creation
 - Include a block-35 view of statements
 - Request new EOC for new component link
 - On-line Web database requires RMC review

Standard Statement Working Group

- New Action items (Sep 15)
 - Pass FAST statements back to CACI
 - Test additional tracking fields
 - Provide enhanced Web based review capability
 - Location, Funding, Security, Business rules
 - Update Standard Statement Manual
 - Consolidate Sources for System List

Standard Statement Working Group

- Follow-on action items (Sep 16)
 - Develop timeline for review process
 - Automatic statement approval after 30 days
 - Business rules must include assessment feedback report, notification process, and statement audits
 - Three phase roll out
 1. Develop and reach concurrence on web model
 2. Design and test utilizing FAST users group
 3. Demo and finalize live version for next meeting
